

PRESS RELEASE

Ingenico reaches 1 million terminals delivered to Latin America market in 2010

Neuilly sur Seine – January 4, 2011. Ingenico (Euronext: FR0000125346 - ING), world leader in payment solutions, announces that it has reached the historic milestone of 1 million terminals delivered in Latin America over the past 12 months. This impressive record in the region demonstrates, once again, the preference of large acquirers and banks for Ingenico's payment terminals and contributes to the worldwide leadership.

The payment terminals, which include POS and PIN Pads equipped with secure magnetic stripe and smart cards readers were delivered to major banks and acquirers in the region over the past 12 months and also contributed to increasing the security of the payment networks of our customers. The markets which showed greatest demand were Brazil, Mexico, Argentina, Colombia, Venezuela, Chile and Peru, where Ingenico has performed with excellence through its own offices, partners and distributors.

Much of this success is attributed to the introduction of the new family of countertop terminals [iCT220](#) and [iCT250](#) whose deliveries totaled 350,000 units. In addition, Ingenico delivered 200,000 units of the wireless terminal [EFT930G](#), and 250,000 units of the countertop terminal [EFT930S-GEM](#). This achievement was also made possible due to the delivery of thousands of PIN Pads [iPP320](#), recently launched in the region, as well as signature capture terminals and the payment PDA [iPA280](#), which together complete the most comprehensive portfolio of payment terminals of our industry.

Oscar Bello, EVP and President of the Latin American Region Ingenico Stated: *"Ingenico's Latin America region continues to grow thanks to the strong customer relationship that has been established during the past 10 years since our arrival in the region. Our continued presence has given our customers the security that we are always here to support our products"*.

Ingenico has presented the market with the most innovative and secure products and solutions, which meet the highest certification standards of the payment industry, such as PCI PTS (international) and ABECs (Brazil), plus certifications EMV L1 and L2. Based on Telium technology, Ingenico's entire portfolio of terminals is equipped with black & white or color screen and include contactless technology (PayPass, PayWave, ExpressPay, Calypso and Mifare) as option. Ingenico also offers a wide range of connectivity like GSM / GPRS, Dialup Ethernet, WiFi and Bluetooth in its products.

About Ingenico (Euronext: FR0000125346 – ING)
